## PROFILE

I'm a student studying IT who is looking for an entry-level job or internship to finish the course and advance my expertise of programming, project management, and teamwork.

I'm looking for the chance to expand my understanding of programming and pick up new skills so I can graduate with my National Diploma in IT (Software Development) and start polishing my skills for a future profession. I put effort into preparing for university coursework and self-taught online courses. I'm determined to put my skills to use as I contribute to a company's objective. Strong creative and analytical skills. Team player with an eye for detail.

## SKILLS

- Analytical & Problem Solving
- Project Management
- C++ and SQL
- Front End Coding
- Information System Analysis
- HTML, CSS
- JavaScript
- NodeJS, ExpressJS
- MongoDB
- Microsoft Office
- Leadership & Teamwork

## EDUCATION

### JAMES NXUMALO AGRICULTURAL HIGH SCHOOL

**2016 - 2018** *Ulundi, Kwazulu Natal*

Obtained my National Senior Certificate with aggregate score of 60.28%. Really Great High School.

### TSHWANE UNIVERSITY OF TECHNOLOGY

**2019 - 2022** *Soshanguve, Pretoria*

Completed every theory-based course. Information Systems, System Software, Development Software, Technical Programming, and Industry Exposure are among the courses that are related to computing (Theory)

### COMPLETE WEB DEV WITH ANGELA YU

**2022 - Present** *Udemy, Online*

# PROJECTS

## BARBERSHOP APPOINTMENT BOOKING

- This is an appointment booking system for my neighborhood barbershop.
- Users can schedule appointments and examine the services offered.
- The system emails the user a confirmation and alerts the barbershop
- Code : <https://github.com/CedriicOde/the-barbershop>

## QUICK ACCESSORS

- A collection of quick API applications, such as a quick password generator, weather app, clock app, and URL shortener and free advice.
- Live : <https://cedriicOde.github.io/quick-generators/>

## ESTATE WEBSITE

- Rebuilt a landing page layout for a Midrand estate. I believed their website's user experience needed improvement after looking at it, so I made my own design without all of their content.
- Live : <https://cedriicOde.github.io/real-estate-landing/>
